Summary : A graduate of Fullstack Academy, I am a Software Engineer with a passion for coding and a mindset for growth, always looking to improve my skills.

Technologies :

React - PWA - Redux - Node.js - Express - Sequelize - PostgreSQL - HTML5 - CSS3 - Socket.io - framer motion - IMDB APIs - Spotify APIs - JWT - Webpack - git

Technical Projects :

Moments:

[live](#) | [github](#)

A PWA web app group project that allows users to capture or upload a photo and match it with a song.

- Authenticated users and obtained authorization to access users data using spotify APIs.
- Effectively used color-thief library to extract the dominant colors in photos.
- Met all pwa criteria, resulting in the ability to install the app without the need to host it in the app store.

Pick a movie:

[live](#) | [github](#)

A web application solo project that allows two or more users to pick and match their favorite movies.

- Successfully established a real-time connection using socket.io.
- Deployed and styled different aspects of the website.
- Utilized modern user friendly interface using multiple advanced tools and apis such as Framer Motion and imdb apis.

Objectively Better Books:

[live](#) | [github](#)

An ecommerce group project selling books that offers different functionality for users and guests.

- Effectively Used express routes to communicate with the frontend.
- Used JSON Web Tokens to store encrypted user information.
- Utilized React to build components to render them on a webpage and utilized Redux for state management.

Experience :

CVS Caremark, Scottsdale, AZ

09/2017 - 11/2021 Clinical Operations Consultant

- Provided Periodic functionality evaluation of internal software applications that are used by clinical operation agents to deliver better business solutions..
- Provided coaching and mentoring to the newly hired colleagues in the clinical operation department..
- Assisted with developing the clinical operations employer manual, including training guidelines.
- Assisted in testing internal programs, releases and updates to ensure the effectiveness of newly added tools and features.

Education :

Fullstack Academy - New York, NY

(17-Week Full Stack Immersive)

Feb 2022 Certificate, Software Engineering

Amazon Web Services Training and Certification

Mar 2022 Certificate, [AWS Certified Cloud Practitioner](#)
